WORLD OF RADIO SCHEDULES updated May 27
<http://www.worldofradio.com/radioskd.html>

** ALGERIA [and non]. 15110, May 26 at 0652, SS0B S6/S9 with ME/Arabic music, i.e. Ifrikya FM, // weaker 13790 under ChiCom jamming vs RFA Saipan. 15110 is Béchar site aimed SE so in general we may expect better reception from there off the back, than Ouargla 13790 aimed SW, so off the side (Glenn Hauser, OK, WOR)

** ANTARCTICA. 15475.98 RCUSB, Sat May 27 circa 2100, no signal direct from LRA36, no surprise, but neither into Argentine nor Brazilian remotes at 2146 chex. Later I see that Manuel Méndez, Spain did hear it but only at *2022-2038* and perhaps never resumed this time (Glenn Hauser, OK, WOR)

** ANTARCTICA. 15475.98 RCUSB, Wed May 31 circa 2010, no signal from LRA36 into Argentine SDR. Manuel Méndez, Spain says it was on today, only at *1936-1954*. Earlier mail from them said would be on Sat & Wed at 15-18 local but that equals 18-21 UT; suspect time conversion confusion (Glenn Hauser, OK, WOR)

** CANADA. 15034 USB, 1816 May 29, Trenton Military with ``no report received`` of aviation weather from Trenton! itself, Ottawa, Toronto, Bagotville; and for good measure tells us all that again. But then does have terminal forecasts for the same. 1820 ID, with ``time: 14-20, zulu``!!! but which is really EDT. At least they are not 4 or 64 minutes slow as was the case for a year or more. Then back to NRRs for the next set of failures: Calgary, Cold Lake, Winnipeg, Edmonton.

Tnx Richard Langley who first reported their latest time confusion: ``A fairly good signal on 15034 kHz USB today (26 May) down here in The Keys at about 21:30 UTC. As usual, many "no report received" for both Canadian and overseas sites for current weather. But there were complete forecasts given for several sites. Announced time, supposedly in UTC (Zulu), would actually have been correct for EDT; i.e., 17:30 Zulu was announced at 17:30 EDT. -- Richard Langley``

I certainly hope Canadian Forces achieve a bit more accuracy in matters of life & death (Glenn Hauser, OK, WOR)

** CHINA. 9900.000, May 29 at 2313, UTwente gets a noisy open carrier at S9, frequency precise, suspect Cairo, Portuguese service sked till 2330. But at 2316 a trace of talk emerges, in Chinese! So CNR1 jammer vs RTI also sked at 22-24. And this goes off at 2400* sharp (Glenn Hauser, OK, WOR)

** CHINA. 15920, May 28 at 2210, CNR1 jammer at S0/S3 slightly stronger than another one on 14920 among few sigs circum19mb. Both in

Aoki as jammed Sound of Hope frequencies (Glenn Hauser, OK, WOR)

** CHINA. 13920, May 30 at 1515, carrier with flutter, presumably CNR1 jammer against SOH, supposedly in a break 15-22, but nothing now on 14920 or 15920 (Glenn Hauser, OK, WOR)

** COLOMBIA. 6016.704, May 27 at 0631, carrier S8/S2, on such a split frequency surely the pirate Organización Radial El Prado. And Ron Howard confirms that: ``COLOMBIA. 6016.68, pirate station - Organización Radial El Prado (thanks again to Rafael Rodríguez R. [Colombia] for the ID), 0550+ UT, May 27 (Saturday). LA songs; frequent, brief announcer; 0632, ended audio (open carrier/dead air); transmitter off at 0634; no choral National Anthem before going off today; poor reception. This station seems to favor weekend broadcasting?`` (Glenn Hauser, OK, WOR)

** COLOMBIA. 10125 CW, May 27 at 0635, no signal from HK3QQ, which had been regular and not always relogged, purveying partly erroneous keyboard letters slowly in sequence. Nor any Oz hams on USB now (Glenn Hauser, OK, WOR)

** COLOMBIA. 10125 CW, May 31 at 0621, HK3QQ is back after missing May 27, and since? With usual slowly spaced keyboard strokes in order with errors and omissions as previously explained, notably X instead of P; and X again between Z and C. Also spells out QTH, BOGOTA COLOMBIA (Glenn Hauser, OK, WOR)

** CUBA. 11670, May 27 at 0644, RHC English, S9/+10 with some squeal. All the 6's are off so also their possible harmonix. This fundamental in Spanish is supposed to turn off much earlier. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 12200, May 25 at 0621, RHC English, S9/+10 undermodulated with squeal, stronger than fundamental 6100, S5/S7. No other frequencies on now. Something's always wrong at RHC (Glenn Hauser, OK, WORLD OF RADIO 2192)

** CUBA. 11760 >>// 15140, Sunday May 28 at 1504, RHC with late-starting weekly Esperanto, and extra 15230 has been turned off already; perpetual totally wrong schedule announced as 0800 on 6100 tho all frequencies off before real summer time of 0700 UT; 1600 instead of correct 1500, as if on 11760 only; and 2?30 on 15730, an RHC frequency abandoned years ago as the third airing of Esperanto could show up on any half-hour around there on any frequency. Esperantists are clueless about their own real schedule. The guy also continues to mispronounce ``politiko`` stressing the first i as if were still Spanish, instead of second i as absolutely required penultimately Esperantoly. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 11670, May 30 at 0629, RHC English, S9/+10 with some squeal, wrong frequency and only one still on. Maybe so often it will become ``right``? Lacking any A23 schedule of what RHC intends to do;

something's always wrong (Glenn Hauser, OK, WOR)

** FRANCE. 13840v, May 29 at 0543, talk in French mentioning Osaka; trying to measure, I can hear it varying slightly in real time, at one point on 13840.109. Typical behaviour of defective Issoudun transmitter, and confirmed as such with NHK relay in French at 0530-0550 only (Glenn Hauser, OK, WOR)

** GERMANY. 15220, May 30 at 0628 music, about the SS0B, but off at 0630. It's AWR French via Nauen at 0600-0630 for WAF; for NAF to resume at 07-08 in Arabic, 0830-09 in TAH which means ``Tachelhit/Sous: Morocco, southern (4m), Algeria [shi]`` (Glenn Hauser, OK, WOR)

** GUAM. 15680, May 25 at 1540, KSDA only frequency audible into Japan SDR, S9+30/40. Seems they have only one transmitter going; AWR ID, Pune address and phone number in scheduled Kannada; 1559 S/off in English, never mentions call letters KSDA, power as 100,000 watts. WRTN 2023 shows KSDA has 5 x 100 kW. Scheduled next at 1600 on 12080 but not on air.

Also at 1536 May 25, no scheduled frequencies from KTWR to be heard. WRTN says they have 1 x 100 and 2 x 250 kW. Jose Jacob, India heard from KTWR that they were closing down before the typhoon, everyone OK afterwards but as of May 25 not yet safe to work on antennas (Glenn Hauser, OK, WORLD OF RADIO 2192)

** GUAM. 15680, May 26 at 1540, via S Korea SDR, KSDA Kannada service is only frequency on air, like yesterday, no 15670 or 15615 as on their sked. Perhaps they have enough generator power to run only one even if antennas and the others undamaged. No-call AWR sign-off at 1559 in English to 1600* and no show on next sked frequency 12080.

Again today, KTWR totally absent from its sked frequencies at 1540: 15390, 9900, 9870. Handy skeds by time at:
<https://qsl.net/vu2jos/A23/KSDA.pdf>
<https://qsl.net/v/vu2jos//A23/KTWR.pdf>
(Glenn Hauser, OK, WOR)

** GUAM. Re 15680, the only KSDA frequency I have been hearing on air until 1600, Jose Jacob, India, has monitored the complete schedule and confirmed only one at all times, two others missing: ``LATEST monitored schedule of KSDA Adventist World Radio, Guam after Cyclone Mawar damaged the area is in
https://qsl.net/vu2jos/KSDA_Mawar.pdf
-- Thanking you, Yours sincerely, Jose Jacob, VU2JOS`` on the WOR iog
(Glenn Hauser, OK, WOR)

** GUAM. Re KTWR missing all frequencies since Mawar, John the VORW reports to WOR iog: ``I found this on the TWR Facebook Page - in regards to the status of KTWR, it reads as follows:

"Typhoon Mawar has left the Pacific island of Guam, and as we've

shared previously, TWR staff and their families stayed safe.

However, damage to the facilities of KTWR, our shortwave station on the island, was worse than originally believed, and members of our TWR family on Guam are in the midst of a difficult situation. Challenging days lie ahead, and your prayer support is greatly needed.

Grant Hodgins, station director at KTWR, and two key members of the team were able to reach the station on Thursday morning. Although it was still too windy for a close inspection, it was apparent that all five of our antennas sustained damage, Hodgins reported.

KTWR uses shortwave signals to reach a large swath of Asia with the gospel message, and because of the nature of shortwave, the programs are aired at night. But for the third night in a row, KTWR was unable to broadcast on Thursday night.

The team planned to regather at 9 a.m. Friday – 7 p.m. Thursday in the Eastern U.S. – to determine next steps. A key issue will be Antenna 1, which is a total loss, Hodgins said.

The families of TWR personnel are all accounted for and are doing okay. Still, most have no power or water. Staff on Thursday were focused primarily on caring for their families.

To be sure, the impact could have been much worse. As the typhoon approached Guam, the southern section that includes KTWR was in line for a direct hit. We asked for prayer, you responded, and we watched in wonder as our Father pushed the storm northward at the last minute. We sustained a glancing blow instead of a direct hit.

But a glancing blow from a Category 4 storm is a serious matter. Please continue to be in prayer for our TWR family on Guam and the 173,000 residents of the island, all of whom have been affected. Please also pray that we'll soon be able to resume programming to the listeners across Asia for whom TWR is a spiritual lifeline."

Included in the post is a photograph of a damaged antenna.

<https://www.facebook.com/photo.php?fbid=957557932090148>

All the best, John, Orlando, Florida`` (Glenn Hauser, OK, WOR)

** GUAM. 15670, Sunday May 28 at 1542, AWR Wavescan as sked on KSDA, Jeff interviewing someone from RBA in Sydney: and 15680 in Kannada is also on with S Asian music. So unless a substitute site, AWR already have two transmitters running instead of one following Typhoon Mawar. Still no 15615, the third one scheduled, in Gujarati. See https://qsl.net/vu2jos/KSDA_Mawar.pdf (Glenn Hauser, OK, WOR)

** GUAM. 15440, UT Sunday May 28 at 2207, AWR Wavescan with Ray about Maldives, at S3/S5 one of better among few sigs on band. About same as 15770 WRMI, better than 15720 RNZP. This is KSDA as scheduled in English on Sundays. Jose Jacob had not checked this daypart for which frequencies might have survived Mawar. Earlier it had been reported

off; DX/SWL/MEDIA PROGRAMS amended as has the latest edition of Jose's KSDA Mawar monitoring (Glenn Hauser, OK, WOR)

** GUAM. Ben Dawson, WA, of Hatfield-Dawson reports May 30 about KSDA: ``Glenn, I am told that there was some damage to two of the AWR curtains, but they anticipate having them repaired and back in service this week. And the related 630 medium wave KICH (at the same site, using one of my temporary antenna kluges) is on the air with no problems except when they are working on the adjacent curtain as the temporary antenna uses one of the curtain towers for support. ben`` (Glenn Hauser, OK, WOR)

** IRAN. 9855 > 9835, Sun May 28 at 1950, VIRI English with mailbag, but very thinly undermodulated on both into UTwente (Glenn Hauser, OK, WOR)

** KOREA NORTH. 11710, May 28 at 1511, VOK in English to us is good S9/+10 with `news` about children's nutrition, as if they cared; 1513 ending with caster giving his/a name, ID as ``VOK, Voice of Korear`` and into a sweet/saccharine song, ``Our Father`` -- guess who? Not the One in heaven (Glenn Hauser, OK, WOR)

** KURDISTAN [non]. 17470, May 26 at 1514, only signal direct just below 17500, above 17445 is JBA carrier here, presumed Recep's Turkish jammer and/or Dengê Welat (Glenn Hauser, OK, WOR)

** MEXICO. After a bunch of Florida FM DX, I resume in the car -- see USA for details, and immediately hear Spanish:

92.1, May 30 at 2324 UT, strong signal with folk? music so not OK; 2331, Spanish ad in pesos, so not Unitedstatesian; 2332 Soriana ad, a Mexican market nationwide chain, and others in frenetic string; 2345 possibly a different station since now there are ``Radio Disney`` IDs between every commercial; must have heard at least 6 of them; includes Walmart and Home Depot, in Spanish. Faded by 2353 when I hear an OKC ad, i.e. K221FQ, 99 watts of KRMP 1140.

XHFO-FM 92.1 CD. DE MÉXICO CDMX MEX Spanish CONTEMPORARY HIT RADIO
RADIO DISNEY 100.0 134.0 19-25-57 99-07-59 230C - 'KHFO Radio Disney
XFM - ELEVA TUS XPECTATIVAS
1890 km/1174 stmi

92.9, May 30 at 2326, ``La KeBuena``, ad for Los Tigres del Norte at Arena Ciudad de México el 9 de junio; fadeout by 2330 and no DX on higher frequencies now. There is another Que Buena on 92.9 in San Antonio TX, but it's too close and CDMX on 92.1;
XEQ-FM 92.9 CD. DE MÉXICO CDMX MEX Spanish REGIONAL MEXICAN KE BUENA
79.07 79.07 214.0 214.0 19-23-40 99-10-26 1929 92.9 FM LA KEBUENA 92.9
FM LA KEBUENA Country
(Glenn Hauser, Enid OK, WOR)

** NORTH AMERICA. 7400, May 27 circa 0630, still no signal from pirate R. Vostochnaya Zvezda. Lucas Bandura updates the WOR iog about this May 27:

``Re: [WOR] Radio Vostochnaya Zvezda 7400 AM off air --- The operator has built another a transmitter for 7400 kHz. He is running it into a dummy load for now to test it. His latest message on the HF Underground discord was "anyone know if it is normal that the audio is quieter than normal when running into a dummy load? for AM mode. just doing some final tests now before going on air. need to make sure everything works properly."

He was originally going to use 4 MHz, which I said would be pointless due to the poor range (he was barely heard when he was using 4015 USB). He also considered 13.95 MHz for broadcasting to Japan, but he doesn't have a transmitter for that frequency right now. He changed his station name to Kawaii FM (FMのかわいい) and the new format will be Japanese music.`` (Glenn Hauser, OK, WOR)

** NORTHERN MARIANA ISLANDS. Post-Mawar info from Ben Dawson, WA, May 29: ``Glenn, It is reliably reported that one of the Tinian antennas suffered a few broken reflector wires but that there are no other reported issues. There are still antennas at Tinian that have to be completely rebuilt as a result of typhoon Yutu in 2018. Saipan's have all been restored. bfd`` (Glenn Hauser, OK, WOR)

** OKLAHOMA [and non]. 910 kHz, May 29 at 1910 UT, JBA signal into only one of my rx and ant on daytime groundwave, no doubt KVIS, Miamuh. I'm checking out for this on the IRCA iog: ``KVIS-910 Format? May 27 #34276 Saw a report today that says KVIK {sic} is now C&W from GOS/REL... anyone on the list able to confirm or deny it? Website still has the "King's Vision" logo but the steam {sic} doesn't work. 73 Wayne Heinen N0POH, Editor, NRC AM Radio Log, Aurora, CO``

For the next dekamminute until 1920, I only hear music with segues - maybe classic rock, but with praisy tinge? Not sure, all instrumental. Anyway, unseems C&W. Also a SAH of almost 1 Hz or 56/minute. Other station likely KATH[olic, EWTN], Frisco in north TX, U4 1000/500, rather than KINA, Salina KS, U4 500/29 with Fox Sports Radio. MWoffsets has only a KVIS reading as of 2018-01-23 of plus .0009 kHz, i.e. almost 1 Hz high; so the QRMer would be either close on .0000 or plus .002 kHz. I've certainly heard KVIS easily before, but a check last night did not acquire it vs the QRM. My best chances will be skywave before SS or after SR which UT in May are: 0115/1115; June, 0145/1100. Distance: 273 km/170 stmi. Direxional pattern for KVIS U3 1000/1000, i.e. same day and night is ENE/WSW so we are close to the major lobe 68/248 degrees per FCC, but it's tight so edging toward a null:
<https://radio-locator.com/cgi-bin/pat?call=KVIS&service=AM>
hope to have some results shortly, in time for next report (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 910 kHz, further checking for new format of KVIS, Miamuh as in previous report: UT Tue May 30 I spend more than an hour of continuous listening and hear no announcements whatsoever -- no DJ, no ads, no slogans, not even legal IDs circa two hourtops. First on the

NRD 545 with Wellbook antenna E/W. Details:

0047 classic rock, S0/S1; 0049 pause and another tune. I don't recognize most of them but I would say this is AOR, i.e. playing track after track with several seconds' pause between them. Almost all instrumental. The ~1 Hz groundwave SAH is still there, increases at 0056 as one or both sigs fade up a bit. Music past 0101, no ID! 0103 SAH gets heavier such that the fading noise itself is increased QRM to the modulation. 0106 YL vocal. 0112 SAH noise peaks, segué, now S1.5/S2. 0120 f/out too weak even for ECSS to lock on; 0123 f/in, still tunes, 0126. Approx. LSS at KVIS is 0130 UT now at Monatswechsel between 0115 May and 0145 June. Sig now ranges S1.5/2 again.

Then I switch to caradio in garage with ND antenna in case it's any better. Skywave from Iowa etc. now in tophalf of band. WSUI, onetime WORLD OF RADIO affiliate, might make it on 910. At 0149 some Irish? music peaks, maybe not KVIS, then back to a vocal ballad. 0154 song with lyrics mainly ``Give It Up, Africa`` - not sure of last word. More segúes, no ID past 0201 when local noise level obscures whatever as some neighbor turned something on. The nearest streetlight emits an RF noise burst as it switches on automatically, but it's only brief and should have been earlier. Enough! (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 102.7, during FL FM DX opening, May 30 at 2117 UT, not much signal from KJYO OKC; not obscured by DX, just very weak compared to the other full-powers from OKC like 100.5, 101.9, 104.1. I do pull a ``KJ103`` ID JBA at 2355 as I quit. Something must be very wrong. WTFDA listed as:
KJYO 102.7 OKLAHOMA CITY OK CONTEMPORARY HIT RADIO KJ-103 94.1 kW
372.0 m HAAT 35-35-52 97-29-22 1A42 KJ103 Artist/Title Top 40 (Glenn Hauser, Enid, WOR)

** OKLAHOMA. Lawmakers Override Gov. Stitt's Veto, Extend OETA Contract
Thursday, May 25th 2023, 4:05 pm By: Haley Weger {with audiovideo}

<https://www.news9.com/story/646fcee6aac85008de01f309/lawmakers-override-gov-stitts-veto-extend-oeta-contract>

Lawmakers are using the final days of the legislative session to override Gov. Kevin Stitt's vetoes. One of the vetoes: to extend the contract for OETA to continue operating until 2026.

The override ensures that the continuation of the only public TV station in Oklahoma, which was a big goal of the state legislature this year.

Both the Oklahoma House and Senate decided to override the governor's veto for the OETA bill on Thursday. A bipartisan effort in both chambers.

The governor vetoed the House bill that would continue funding OETA earlier this month.

Stitt called OETA an outdated system saying, "I don't think Oklahomans want to use their tax dollars to indoctrinate kids."

The governor's office sent News 9 a list of shows that Stitt deemed "inappropriate content," including an episode of "Clifford the Big Red Dog" that featured the topic of gay marriage.

=====

<https://www.oklahoman.com/story/news/politics/state/2023/05/25/oeta-funding-oklahoma-legislature-house-overrides-governor-kevin-stitt-veto/70256730007/>

Lawmakers override Stitt's vetoes, including OETA legislation
Dale Denwalt
Oklahoman

The Oklahoma Legislature fired back at Gov. Kevin Stitt's veto authority on Thursday, ensuring the continued survival of OETA and criticizing the governor's "tantrum" earlier this session that led to 20 bills being vetoed.

Cheers broke out in the Oklahoma House of Representatives as lawmakers approved the bill that reauthorizes OETA as a state entity for at least another three years. The Senate added its override vote a few hours later.

In his veto of House Bill 2820 last month, Stitt said he questioned the public broadcaster's value to the state. He later claimed OETA "overly sexualizes" children and indoctrinates them.

Asked for proof, he pointed to news programs that discussed transgender issues and scripted programming that acknowledges the existence of LGBTQ people.

Thirteen bills were pressed into law Thursday as lawmakers spent hours undoing the governor's decisions. Some had pointed words for the governor.

State Sen. Julie Daniels, R-Bartlesville, said Stitt "ignored the authority of the Legislature" when he vetoed a bill to reauthorize the board that oversees licensed architects and interior designers.

Stitt also showed "no logical reason or rational thinking" when vetoing a bill that corrected an error in previously adopted legislation, said state Sen. Todd Gollihare, R-Kellyville.

During the months-long legislative fight over how to give families a tax credit for sending their child to private school, the governor vetoed 20 unrelated Senate bills as retribution for not yet adopting his tax cut and education plans.

"We're not even dealing with a policy bill, yet here we are today

taking up the time of the Senate to address a veto message that appears to me to be nothing more than a tantrum," said state Sen. Chuck Hall, R-Perry.

Senate Floor Leader Greg McCortney referred to the bills as the "tantrum 20."

"During a recent tantrum, the chief executive of the state indicated that he did not think it was important for hospice patients who reside in nursing homes to have quick access to pain medication," said McCortney, R-Ada, referring to the veto of Senate Bill 249.

Between the House and Senate, lawmakers considered veto overrides on nearly three dozen bills Thursday, but only 13 were overridden by both chambers. In total, 32 out of the 46 bills vetoed this year remain in jeopardy, including legislation on victim protective orders, McCortney's bill on hospice medicine and modifications to assistance programs for state employees and disabled Oklahomans.

House lawmakers sustained the governor's veto on legislation that could have made it more costly to defend against SLAPP lawsuits, or strategic lawsuits against public participation.

Vetoes on the following bills were overridden by both chambers on Thursday. Lawmakers will meet again Friday, leaving time for additional overrides if leadership bring them to the floor.

SB 299: Re-creates the Oklahoma Advisory Council on Indian Education

SB 429: Allows students to wear tribal regalia during graduation

SB 563: Relates to Medicaid reimbursement for anesthesia

SB 623: Various measures related to Service Oklahoma issuance of driver's licenses

SB 712: Directs the Department of Mental Health and Substance Abuse Services to provide emergency opioid antagonists (naloxone) to hospitals

SB 775: Relates to county employee education programs

SB 840: Allows collegiate athletes to negotiate name, image and likeness contracts without securing a licensed agent

SB 951: Raises county commissioner and sheriff travel allowance

HB 1843: Transfers responsibility to enforce the Patients Right to Pharmacy Choice Act from the Oklahoma Insurance Department to the Oklahoma attorney general

HB 2255: Authorizes several new specialty license plates

HB 2263: Removes the governor's sole authority to appoint members to the Oklahoma Turnpike Authority

HB 2820: Reauthorizes OETA for another three years

HB 2863: Establishes the Oklahoma State University Veterinary Medicine Authority to oversee veterinary medicine education programs

** OKLAHOMA. Re: [WOR] Lawmakers Override Gov. Stitt's Veto, Extend OETA Contract

--- another version:

https://www.enidnews.com/news/veto-overrides-save-oeta-tribal-regalia-rights/article_8e5739f0-fb64-11ed-87ab-63d0ee73852b.html#tncms-source=article-nav-prev

Veto overrides save OETA, tribal regalia rights
Janelle Stecklein | CNHI Oklahoma 3 hrs ago

OKLAHOMA CITY – Oklahoma lawmakers overrode 13 of the governor's vetoes on Thursday, including those dealing with tribal regalia and the state's lone public television station.

Lawmakers noted they had a smorgasbord of bills to choose from, as Gov. Kevin Stitt had been unusually heavy-handed with his vetoes, already rejecting 46 pieces of legislation as of Thursday morning.

Legislators were able to garner enough support in both chambers to override 13 of those vetoes, turning the legislation into law. After their vetoes, among other things, Oklahomans will have:

- Continued access to OETA, the state's public broadcaster, which was at risk of closure after Stitt questioned the long-term strategic value of the station.
- A state name, image and likeness (NIL) law for collegiate athletes and universities.
- New protections in law for Native students who want to wear tribal regalia at public school graduation ceremonies.
- University of Kansas license plates. {??}
- A new makeup of the state's turnpike authority oversight board.

Many other pieces of legislation made it partway through the veto process. Lawmakers theoretically could consider additional overrides on the final day of session Friday as they pass legislation finalizing the state's budget.

State Sen. Casey Murdock, R-Felt, said two of his bills were victims of the political process. He was pushing to overturn Stitt's vetoes related to invasive species and protective orders for children.

"It's not a fun task to override a governor's veto," Murdock said. "I don't take any pleasure in having to make this vote. I do it solemnly, but it needed to happen."

He said having to correct the mistakes made by another Republican is not fun.

"Usually in the end, we make the right decisions here," he said.

Choctaw Nation Chief Gary Batton celebrated the Legislature's veto

override of Senate Bill 429, which enshrines into law Native students' right to wear tribal regalia at graduation ceremonies.

"This measure should not have been controversial," he said in a statement. "It has no costs for schools and expands students' rights to honor their heritage. We look forward to seeing members of our tribe and others honor their heritage at important moments in their lives."

State Rep. Trish Ranson, D-Stillwater, said 46 Stitt vetoes this year seems like a lot, but some were related to budget fights and were "another example of the dysfunctional supermajority that (we have) going on."

House legislators Thursday let stand most of the 20 vetoes Stitt made on fellow Republicans' bills after he became frustrated by their lack of action on his tax and education priorities.

State Rep. Kevin McDugle, R-Broken Arrow, said the governor understood a lot of his vetoes related to the budget fight would be overridden, but they left House members confused over whether Stitt thought the legislation was sound policy.

"The difficult thing when that's done in this process is, you really don't know what he really wanted to override and what he didn't," McDugle said. "So it makes it a little bit difficult to try and decipher that when there's so many of them."

Support local journalism.``

{related: note that appointed by Stitt, Supt. Ryan Walters, who has been making a lot of enemies, even among Republicans, by his extremist views and axions, ex-officio sits on the OETA board. Since Stitt's veto, we noticed that OETA stepped up its self-promotion without directly confronting Stitt -- gh}

``Education video prompts outrage, tears among educators
Janelle Stecklein | CNHI Oklahoma 6 hrs ago

https://www.enidnews.com/news/education-video-prompts-outrage-tears-among-educators/article_991b816a-fb47-11ed-95d8-83f50fe030f6.html#tncms-source=article-nav-next

OKLAHOMA CITY – Teachers fled a state meeting in tears and stood in a hallway shaking and crying after the state superintendent Thursday, May 25, 2023, unveiled a "propaganda" video that educators viewed as a threat to their safety and livelihoods.

Superintendent Ryan Walters' team later sent the media a link to the full video and posted it to the state Department of Education website, but then swiftly barred everyone from viewing it by setting it to private. Walters' team promised to send a "fresh version," but over two hours later, the video remained unavailable.

State education officials also aired an abridged version of the several minutes-long video at the monthly state Board of Education meeting, but inexplicably muted the audio for those trying to watch the at-capacity meeting remotely.

The video features Fox News interviews of Walters discussing teachers and teacher unions interspersed with a randomly selected mix of National Education Association speaker clips. It included interviews with people, whom educators didn't think were from Oklahoma, and talk of "The Young Adult Experience," as well as blurred graphic and pornographic images.

It ends with the message: "We can save education. Our kids are counting on it."

"There were tears," said Allyson Helm, an Oklahoma City Public Schools teacher who attended the meeting. "People were shaking and devastated by these remarks. And it is nothing less than propaganda. It reminds me of a wartime propaganda video."

Helm, a registered Republican voter, said State Department of Education officials tried to draw an insulting correlation between pedophiles and pornography and educators, she said.

"I taught anatomy and physiology and high school biology for 10 years, and I didn't talk about sex as much as these people at the State Department (of Education) do," she said.

She also said Walters appeared to be attempting to indoctrinate the public to his views.

Walters did not respond to a request for comment about whether it was appropriate to use state resources to make the video or if it was intended to make educators and parents feel unsafe.

Ashley Daly, a parent of a Tulsa Public Schools first-grader, said the video was "very upsetting."

"It made me worry that there are some people who are already feeling upset, (and) it'll radicalize them and maybe make them do something really dangerous in our schools," she said. "Our schools aren't full of the awful people that Ryan Walters makes them sound like they are."

She said it's "terrifying as a parent" that Walters is using rhetoric that could cause someone to shoot children or teachers, when he's supposed to be caring for and protecting them.

Daly, who attended the public meeting, said 90% of Oklahomans send their children to public schools, and if parents really thought teachers were "terrorists or pedophiles," they wouldn't send their children there.

Jami Jackson-Cole, a Duncan Public Schools teacher, said she started crying part way through the video because her first thought was "this is fixin' to get someone killed." She said the video was beyond outrageous and indicated that Walters is "coming after teachers."

"There's no doubt in my mind that if you're not falling right along in line with everything he says, he's coming to get ya," said Jackson-Cole. "And we can't have that. We are in a teacher shortage right now."

She was so upset she left the meeting room, then encountered more teachers outside, also crying. They told her, "It is putting a target on us."

"There's enough crazy people in this world," Jackson-Cole said. "We don't need that. So it was beyond vile and reproach. Just horrible."

State Rep. Mark McBride, R-Moore, said he watched a little bit of the video after people contacted him outraged, but hadn't been able to finish it. Walters already had set it to private.

"You just can't go around calling people terrorists and things like that," he said. "I think that (with) this conduct we're losing that professionalism in all of this. The hatred, the fear mongering that goes along with all this is just not the way we should be doing things."

Support local journalism.``

Greg Hardison, CA, comments: ``Judging by this list of issues, I would surmise this Gov. Stitt either has the brains of a tennis ball, or in my untrained opinion, has some serious personal problems to work out, preferably somewhere other than the state's constituency. How and why do these lousy excuses for human beings continue to be elected to power?`` (via gh, Enid, WOR)

** OKLAHOMA. EDITORIAL: Lawmakers listened to constituents, voted to override OETA veto --- Enid News & Eagle Editorial Board May 29, 2023

Oklahoma State Capitol (OSC)

A native Redbud tree in bloom for spring is shown on the state Capitol grounds in Oklahoma City. The Associated Press

https://www.enidnews.com/opinion/editorial-lawmakers-listened-to-constituents-voted-to-override-oeta-veto/article_6d4b86bc-fbd2-11ed-8d0c-f77bd06b3149.html

It was a wild end to the regular legislative session with Oklahoma lawmakers overriding 13 of Gov. Kevin Stitt's vetoes, including one dealing with OETA – the state's public television station.

It wasn't entirely unexpected by the governor's office to have most of

these vetoes overridden – he had vetoed several bills as leverage for his public education and tax credit plan – which he got.

However, the most significant disappointment to him might be the overwhelming override of his veto against OETA. The governor had vetoed a typical funding authorization bill, and later said he believes OETA is indoctrinating children to the LGBTQ and transgender lifestyle.

“Some of the stuff that they’re showing, it just overly sexualizes our kids,” Stitt said in April. “There’s parents defending child transition on PBS that’s being played.”

Thankfully, most constituents in Oklahoma and lawmakers saw through this ridiculous ideological and hyperbolic accusation.

OETA is one of the nation’s most watched public broadcasting stations, and despite Stitt’s concerns about some programs that support LGBTQ, most parents realize there is more good informational and educational programming on the station than what Stitt is concerned about.

Public television still has an important role in Oklahoma. While several states are cutting or eliminating funds to public television, OETA remains extremely popular among Oklahomans, and it serves all 77 counties.

We’re thankful lawmakers listened to their constituents and voted to override the governor’s veto on funding OETA. Support local journalism. (via gh, WOR)

** PERU. 4810, May 25 at 0648, weak carrier, presumed R. Logos, Chazuta leaving it on all night; had not heard it for some time. Still no 4820 carrier, as Senda Cristiana turns completely off, after initially leaving it on all night (Glenn Hauser, OK, WOR)

** SINGAPORE. 12025, May 28 at 1510, BBCWS in English, S7/S9, best for us now tho aimed for Asia, site as listed. Rumors have been flying that BBC are about to close down this relay, starting with WRTN on disgraced FB. WOR iog discussion that it’s already operating way below capacity, sometimes on wrong frequency.

Stephen Luce, Houston, Texas, reports: ``I found the Facebook thread with the Singapore relay closure discussion. It appears someone at the Oman relay station is saying that Kranji will be closed in July. No further details at this writing. The 13 degree East Asia beam from Kranji has always done well in the central part of North America, so any replacement site will likely not be favorable for us, not that we are a target, anyway`` (Glenn Hauser, OK, WOR)

** SPAIN. 17855, Thu May 25 after 2200, quick check of REE on a non-English day finds this and the other three, 17715, 15520 and 11670 all audible into Maryland SDR: and scheduled at this hour is `Amigos de la Onda Corta`, a sort-of DX program, or media magazine: I haven’t

had time to listen to it for a long time, but when I did there was hardly anything about shortwave on it, despite the title (Glenn Hauser, OK, WOR)

** SPAIN. 17855, Fri May 26 at 2200, token English from SNR is VG direct and the other three frequencies detectable. Justin Coe foresees his feature today interviewing some American pop singer, Ron Sexsmith [? sounds like], as adapted from a bilingual discussion on Radio 3. Sorry, not interested. Is there nothing more important to report from Spain happening in the last biday? (Glenn Hauser, OK, WOR)

** TURKEY. 11785, May 25 at 2211, VOT English is missing for the third day in a row, when checked into Maryland SDR. Maybe something more serious is erroneous at Emirler. Need to check whether other English and various other languages are still airing; such as the other English for us at 0300 on 7275, and for Asia on 6165 (Glenn Hauser, OK, WOR)

** TURKEY. 6165.003, May 26 at *0259, VOT cuts on with IS, S9/+10 into UTwente, off the back of ME beam, and also on by 0300 is much stronger 7275.006, S9+25/35 off the front on way to N America. So Emirler is still functional even with two transmitters, despite AWOL 11785 at 22-23 three days in a row so far. Usual s/on by heavy-accentedness with jumbled, incomplete English schedule. 7275 is quite loud and enough signal to justify opening up bandwidth to 9 kHz, but audio remains lo-fi, down in a barrel? After skipping the news, further notes: 0312, 'with you every hour' promo. 0317, travelog about a city on the Black Sea. Music breaks in between. 0326, multi-lingual ID filler reel. 0333, 'Did You Know That' but I give up trying to understand her. 0348, another promo. 0352 usual s/off with incomplete, jumbled sked. 0353, IS. 0356, pause and restart IS until 0358*. I was expecting IDs in Malay which follows at 0400 on another frequency but none heard (Glenn Hauser, OK, WOR)

** TURKEY. 11785, May 26 at 2159, VOT English is back on the air after missing a triday; I seriously doubt there were any apology or explanation, but of course I cannot possibly listen to and understand every word they are saying. Monitoring direct today at S9/S5 with some increasing ACI from 11780 Brasil; usual heavy modulation but lo-fi audio. After news, 2212 'Weekly Analysis', about the election and impending second round = runoff coming May 28, alleges that only Erdogan can solve Turkey's economic and other problems [so why hasn't he, already?]. Besides music breaks: 2224-2226 multi-lingual ID filler reel. 2235 'Feeling Supreme/The Healing Spring' about irritable bowel syndrome, a repeat until 2241. 2251 'Did You Know That', too accented to understand. 2253 s/off with perpetual defects - no doubt the same recording as ever; 2255 fragment of IS and off* Something's always awry at Ankara (Glenn Hauser, OK, WOR)

** TURKEY. 11785.009, May 27 at 2200, VOT English is not off the air into UTwente but S9+30/45. Usual hefty modulation and thick accents, but no time to listen today, rather OETA ONR = Oklahoma News Report starting with OETA's own salvation from the veto of evil governor

Stitt, overridden by sane Republicans (Glenn Hauser, OK, WOR)

** TURKEY. 11785.009, May 29 at 2227, VOT not off the air in English, S9+45/50 into UTwente, with a ``new program``, i.e. ``the conquering of the city of Constantinople, capital of the Byzantine Empire, by the troops of the Ottoman Sultan Mehmed the Conqueror on 29 May 1453. Wikipedia`` but it lasted only one minute until 2228. Later at 2246-2251, `Feeling Supreme/The Healing Spring` about insulin resistance. Off the air before 2300 (Glenn Hauser, OK, WOR)

** TURKEY. 11785.009, May 30 at 2244, VOT English to us is not off the air today, not checked earlier as I was occupied with FMDX; Turkish song at S9+50 into UTwente. 2246 `Always by your side` promo (Glenn Hauser, OK, WOR)

{UNIDENTIFIED}. 13550, May 29 at 0542, I happen to be here during a routine bandscan where there is CODAR swirshing at the rate of 2X per second, when suddenly I hear Morse code --- not pure CW tonality but diffuse, starts with WR----, so another CODAR ID. Wish I could copy, but too fast by surprise and only twice?

I suspect same pattern like before as explored in great detail last February, per: https://www.w4uvh.net/ghlogs_2023_0209_0216.txt with linux for searching, a full call was traced to the MS/AL/FL Gulf coast:
``CODAR CW ID copied on 4752+ kHz exactly every icosaminute, twice at :03, :23, :43 past the hours, WRPW597``

So I'm back on 13550 by 0602, and barely perceive a trace of another ID burst but uncopiable. No doubt we can eventually get it by monitoring at :02, :22 and :42 past the hours. It may be audible over a broader range than 13550 only; CODAR expanse at 0542 was approx. 13435-13565. Another check at 1522, weak CODAR and no ID heard altho maybe tuned in a few seconds too late. Also a JBA carrier on 13550, one of countless ChiCom jammer frequencies against Sound of Hope. Probably there are more CODAR IDs out there on other ranges going unnoticed (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 13550, May 30 at 0319-0323 and 0337-0344, amid CODAR swirshes into Missouri SDR, NO Morse code IDs to be heard, contrary to my expectation that they would fire every 20 minutes. At 0322 however a quick data? burst which may have been an ID in some other form. At 0342 one long tone. Nothing after 0400, when CODAR itself has almost faded out. Guess will require attentive monitoring over a whole hour, or more.

13500, May 30 at 1518 I'm parked here closer to the center peak of CODAR, 13445-13550 with 2X/sec pulses, only S6; and an ID does fire at 1522, thrice but again I can't copy it beyond WR---- something. All set for next one at 1542: no show. After that no CODAR anyway. Need to get it recorded sometime (Glenn Hauser, OK, WOR)

** U S A. 13500, May 31 at 0602, finally copy definite Morse code ID

thrice amid CODAR: WRPW865 - note that the first four letters are the same as for the 4-MHz one tracked in Feb to the MS/AL/FL Gulf coast. And again at 0622 in its icosaminute cycle. Total CODAR audibility range approx. 13445/13570. So exact center would be 13507.5.

For more info I first try www.radioreference.com but goes nowhere beyond Sonoma County on that call. On to FCC ULS which gets it; from propagation clues I figured it would be on California coast.

** U S A [and non]. WORLD OF RADIO 2192 monitoring: confirmed UT Saturday May 27 at 0130 on WRMI 5850, S9+10 direct but with heavy storm noise level [HSNL]. And still not on 7730. I also check some remotes: New Hampshire has continuous ute roar atop 5850 and not on 5845 or 5855! None such audible direct or into Missouri SDR.

I was about to remark that the R. Angela WBCQ airing UT Sats at 0400 was always right on time --- but not tonight. On 5130 -23 Hz - 5129.977 into Maryland SDR, 'FTIOM' is running late until WOR can start at 0406 May 27. Glad we still made it on, but not glad transmitter cut off at 0432*, 3 minutes before I could finish. What was the problem. UB Tilford replies: ``Had to reload broadcast file into the system due to an upload glitch, whole broadcast started late. System unfortunately went off at normal cutoff time. Sorry about that.``

Also confirmed Saturday May 27 after 1600 on WRN streams. No connexion at first so I thought may have changed, but still:
<http://streaming.edmradio.online:8025/NAMAAP>
<http://streaming.edmradio.online:8025/WRN-E>

Also confirmed Saturday May 27 from 1929 on WA0RCR, 1860 AM, MO, S9+15 by groundwave into nearby SDR. Next:

2230 UT Saturday WRMI 5850 to NW
2230 UT Saturday WRMI 15770 to NE [and 7730?]
0030 UT Sunday WRMI 7780 to SW
0245vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0457]
1330 UT Sunday WRMI 9955 to SSE [NEW]
[also phonecast, webcast][jammed by Cuba?]
2000 UT Sunday IRRS 1323 & 918? & 207?-Italy
0030 UT Monday WRMI 7780 to SW
0300vUT Monday WBCQ Area 51 6160v to WSW
0030 UT Tuesday WRMI 9395 to NNW
2330 UT Tuesday WRMI 9395 to NNW
2100 UT Wednesday WBCQ 7490v to WSW
0030 UT Thursday WRMI 9395 to NNW
0130 UT Thursday WRMI 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2192 monitoring. Confirmed Saturday May 27 as the only WRMI airing starting at half past half past the hours: 2230:30 and on all three frequencies: 7730, S8/S9 into Maryland SDR; 15770, S9/+10 into UTwente; and 5850, almost synchronized via different remotes.

Also confirmed UT Saturday May 27 at 2346 in progress on

NEXUS/IBA/IPAR webcast where scheduled at 0130 CEDT Sundays, but as usual it's about 3 minutes late getting to the mid-break since they really insert Feature Story News first contrary to sked at 2330-2333; which means my last two minutes are lost, since even prolonged beyond 2359 to 2400 when there are two fadedowns before gone and replaced by: fill music!

Also confirmed UT Sunday May 28 at 0054 the 0030 on WRMI 7780, S9/+10 and noisy into Louisiana SDR.

Also confirmed UT Sunday May 28 starting at 0320 on WA0RCR, 1860 AM, MO, S9+15/20 into nearby SDR, with nearby storm crashes.

Also confirmed Sunday May 28 at 1355 the new 1330 on WRMI 9955, S5/S6 direct but no jamming audible. Next:

2000 UT Sunday IRRS 1323 & 918? & 207?-Italy
0030 UT Monday WRMI 7780 to SW
0300vUT Monday WBCQ Area 51 6160v to WSW

(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2192 monitoring: ``From: Richard Lemke, St. Albert, Alberta, Canada, the desk of Richard's listening Post, Radio: JRC NRD-535 HF, Antenna: random long wires in the trees. Dear Glenn: Confirming World of Radio #2192, Happy Memorial Day, WRMI:
5850, static, QRN, S7 signal, 0130, 0141, 0152 (45433), (45343), 0159, May 27 UTC 2023 [Sat]
15770, 2231, 2245, 2254, S5, S6 signal, 2259, May 27 UTC 2023 [Sat]
(Lemke, Richard -AB)``

Also confirmed Sunday May 28 at 2000 on IRRS SW via AM Italia, 1323 kHz, S9+10 into nearby Noale SDR, lite QRM. This week *not* cutting off last 5 minutes but complete to 2029, immediately followed by opening of 'Counterspin' for a bit before it's chopped off for ID and then 2030 'AWR Wavescan #743'

WOR 2192 also confirmed UT Monday May 29 at 0030 on WRMI 7780, S8/9+10 into Louisiana SDR but first 14 seconds blasted away by external noise burst starting at exactly same time. If only the 0030:00 7780 airings could start later at 0030:30 like the ones at 2230:30!

Also confirmed UT Monday May 29 at 0300 on WBCQ Area 51, S7/S9 on 6160 -67 Hz = 6159.933 into Maryland SDR, on time since this fortnight, JL gotta go by 0259.

Next:

Full schedule including AM, FM, webcasts, satellite, podcasts:
<http://www.worldofradio.com/radioskd.html>

Like our website, a noncommercial service for which financial
support is appreciated; thanks this week to Steve Zimmerman, West
Allis, WI, for a generous US\$ check to Glenn Hauser, PO Box 1684, Enid
OK 73702

Or via PayPal, not necessarily in US funds, to woradio at yahoo.com
(Glenn Hauser, OK, WOR)

** U S A. 7730, May 25 at 0049 at first I think this WRMI is gone
again, but with BFO, JBA carrier detected in hi storm noise level;
also 7780 slightly stronger. But 7570 TOMBS is S9/+10. Aiming it
thisaway makes all the difference (Glenn Hauser, OK, WORLD OF RADIO
2192)

** U S A. (7490-), UT Saturday May 27 at 0000, WBCQ webcast with
'AAAWWW', quickly recognized as a rerun, as Allan starts talking about
fixing things, entropy; Angela's mike is on and she is in studio; hot
& humid in Florida, etc., etc. What did he say on disgraced Twitter
today? Nothing: since May 24. Just before at 2359 May 26, the FKB
gospel huxter claimed he is also on WWRB 3215! A station which has
failed to exist for 2 or 3 years now. I'll check the WBCQ frequencies
into NH SDR, hoping it's accurately calibrated: At 0012: 5130 -15 Hz =
5129.985; 6160 -66 Hz = 6159.934; 7490 -73 Hz = 7489.927; 3265+ OFF.
WLCR 9330.001. WWV on 10000 & 15000 within a fraction of 1 Hz (Glenn
Hauser, OK, WOR)

** U S A. 7490-, Sunday May 28 at 2200, NO signal direct, not even a
JBA carrier from WBCQ for 'UBMP'. Is it even on the air? It is by 2248
when I check via Maryland SDR. Propagation has been pitiful tho SF and
K-index numbers seem moderate, but there have been and shall be
blackouts. Anyway, needs to be on higher band summer daypaths - but
not too high. Even the SuperStition on 9330 is VP altho probably not

aiming thisaway (Glenn Hauser, OK, WOR)

** U S A. 5130 -22 Hz = 5129.978, UT Tue May 30 at 0235, S9+5/15 into NH SDR, I tune in WBCQ R. Angela; on the sked every week in May this hour is 'Marion's Attic', but it's 'Greek Music Refuge' instead, nice mx with occasional words from Zach, closing at 0259 by UB not giving the title. And 0300 'FTIOM', an hour when there is a fifth Monday at the curator's choice. I check my calendar again: yes, this is Monday, not Friday. Furthermore, a surprise replay of WOR 2192 at 0400 UT Tuesday, perhaps makeup for incomplete airing on UT Saturday. HARDly: already off at 0422 check: probably chopped circa 0412, the usual finish on Monday nights. Must have been a playback of the UT Saturday program file, which had problems originally. Seems WBCQ is unable to adapt to short-term variations. Anyway, check <http://wbcq.com/radio-angela-schedule-may-2023.pdf> for what's planned for the rest of May --- and that's it! Just in from Bill is some very sad news:

` `Press Release: Radio Angela To Cease Broadcasts May 31

WBCQ's Radio Angela, which began broadcasting a little over a year ago, was a bold experiment in quality programming. It carried world music (including the last Greek music on shortwave after Greece itself stopped broadcasting on the sw bands), great literature read aloud, new music releases by independent artists, some of the best vintage music on any radio band, science and comedy. It avoided the political and religious programming about which so many shortwave listeners love to complain but which are also the bread and butter that keep most private shortwave stations alive. The production standards were frequently nearly public radio quality even when not sourced from public radio. We also brought several new voices from around the world onto the shortwave bands who had never been there before.

It was known from day one that its long term success would depend upon attracting an adequate amount of both listener contributions and program buyers outside of regular core hours.

Critically and artistically, Radio Angela was a great success, and many thanks to all who gave us public and/or private support of any kind. Financially, however, this has not proven to be viable. The airtime buyers didn't come, and neither did enough donors. Consequently, Radio Angela's last transmission as Radio Angela will be May 31 (June 1 0200-0412 UTC).

Some individual programs are likely to continue in some form on the WBCQ grid; my own individual flagship programs (From the Isle of Music and Uncle Bill's Melting Pot) will be going on hiatus for a least a month, possibly longer, on both 5130 and 7490, and my other shows will be discontinued altogether. This is a purely financial matter, and if we could find a nice wealthy philanthropist who loves shortwave, perhaps this wouldn't need to happen.

This is hardly the first quality venture on radio or tv to end this

way - Radio Angela had more weekly broadcasts than the original Outer Limits television series to name but one example, and the roads of radio generally are littered with the corpses of worthy broadcasting concepts and stillborn projects. My thanks to Angela and Allan Weiner for going out on a limb and backing the project, to all the content providers for their hard work and excellence, to the technical staff, some of whom are no longer with us, and to those of you who cared that we were on the air.

Those who lament the religious and political programming that keep private shortwave stations alive are welcome to consider us a case study in what is likely to happen without those dollars. I obviously lack the right answer, but I have learned a great deal about the right questions. 73,

William "Bill" Tilford, Owner/Producer

website: www.tilfordproductions.com``

How unfortunate. Of course that means no more WOR on 5130 at 0400 UT Saturdays. Maybe some other convenient time can be found on that frequency? (Glenn Hauser, OK, WOR)

** U S A. 'The Takeaway', May 30 at 1806-19 UT via KOSU 91.7 and various times on many other public radio stations: Melissa Harris-Perry with retrospectives celebrating program and personal accomplishments as canceled show is in its final week. I gather i.a. she has been an LGBTQ+ activist. Finale should be Friday June 2 (Glenn Hauser, OK, WOR)

** U S A. My first big sporadic-E FM DX opening of the year, May 30 from 2115 UT until I suspend at 2225 with some fadedowns after a lot of Florida stations logged up to 105.9, many of them heard before. DXMAP had showed 107 MHz MUF spike between here and FL to get me going. And at 2230 it shows quite a nexus over Mississippi. Will take a while to compile details, for my next report (Glenn Hauser, OK, WOR)

** U S A. My first sporadic-E FM DX opening this year, May 30 I see an MUF spike of 107 MHz between here and FL on DXMAP, so out to the car in the now hot garage, mid-80s at last outside, to DX on the stock Nissan Sentra 2004 caradio with fender vertical antenna only; all logs in real time with my own ears, no RDS capability, no internet for stream comparisons; but research later from my scribbled notes, mainly the WTFDA FM Database, also in general searching if needed. All times strictly UT! Numbers just before geo coordinates are kW ERP and antenna height above average terrain in meters. Identical horiz and vert figures, u.o.s. Last figures are distances in km/stmi city-to-city so approx., not site-to-city, from disitancefromto.net. I

do not count stations, states or anything, what's 'new' or not, and am not in a competition. Clarifications, corrextions welcome.
